Community Choice Aggregation Survey - NEW

Community Choice Aggregation enables municipalities to pool local energy demand together at a large enough scale to dictate and negotiate more favorable terms, decrease electricity costs, choose clean energy, increase consumer protection and reap the benefits of solar or other renewables to the entire County.

Typically, participants observe that the CCA supply rate is lower than or matching the standard rate. It is possible for the standard rate to drop below the negotiated CCA rate in certain months, but CCA is designed to save customers money.
Community Solar is another program Joule offers, this program users receive credits/guaranteed discounts of 10% and the Community Solar works in tandem with Community Choice Aggregation to offer more discounts.

Municipalities have to adopt a local law to begin this process and name a Community Choice Aggregation Administrator. The administrator works on behalf of the municipality to negotiate terms and fixed competitive rates with the energy provider and receives their payment directly from the energy provider. Payment to Joule in no way comes from the residents or municipal budgets. National Grid would remain the utility provider and would still uphold their typical duties of repair, response and billing.

Once the municipality adopts a local law, names a CCA Administrator and accepts the bids and starts the formal process, all energy users in the municipal jurisdiction would be enrolled into the CCA program. If the resident or energy user does not want to participate in the CCA program, the opt out process is extremely simple.

We plan to distribute survey results to the municipal officials to inform them of how their constituents feel about this program. To access the survey visit: https://qfreeaccountssjc1.az1.qualtrics.com/jfe/form/SV_0NESaBL5H54qbNc

**First New York State Bike Census Underway**

NYSERDA and Urban Cycling Solutions are undertaking the first NYS Bike Census to document where, why and how NY residents are riding bikes. While geared toward the more urban areas of NY, there may be areas on the fringes of Tug Hill where it is relevant.

The goal is to collect insights from cyclists and transit customers to better understand opportunities and barriers for active first/last mile transportation.

**Help K-12 Schools Serve More New York Grown Food to New York Kids**

This year, we have an important opportunity to help schools across the state increase their ability to purchase and serve healthier, farm-fresh foods to our children. The New York Farm to School Purchasing Incentive and Grants programs, funded in the state budget, work hand in hand to bring more New York grown food to students in K-12 schools. These programs lead the nation in their ability to help schools buy more local food, thereby improving student health while building resilient local economies.

Research has shown that expanding the Farm to School Purchasing Incentive to include more school meals would make it easier for more schools to participate in
the program and benefit New York farmers and the state economy. Best of all – it will ensure access to healthy local food for students throughout the school day!

With just one click on the “Take Action” button, enter your information and send a customizable letter directly to your state representatives in support of strong funding for these critical programs which improve the health of our children and support our state’s farmers - visit the website:

Support Farmland Protection and Farmland Access Programs
Over 9 million acres of New York farmland form the foundation for the state’s $44 billion farm and food economy, but this irreplaceable land is under threat from development. Between 2001 and 2016, New York lost or fragmented over a quarter million acres of farmland, half of which was considered the state’s best quality farmland. People migrating into rural communities during the pandemic and accelerated solar development have amplified development pressure on farmland across the state.

At the same time, one-third of New York’s farmers are over the age of 65. They own or operate almost 2 million acres of farmland that will be at risk of being sold for development as farmers retire in the coming months and years. It is critical to support these farmers in transitioning their land to a new generation of farmers.

Act now to ask your state representative to support funding for New York’s Farmland Protection and Farmland for a new generation by visiting the following website:

Clean Watershed Needs Survey
Does your community have water quality infrastructure that is outdated or in need of repair? The Environmental Facilities Corporation needs your help to ensure we can fund as many water quality infrastructure projects as possible in upcoming years. We need local governments and other eligible recipients to participate in the Clean Watersheds Needs Survey (CWNS). Your participation is critical to ensure New York State continues to receive a high level of funding for water quality infrastructure projects.

You can help by submitting your community’s needs and cost documentation to EFC. Together with other communities, your participation will help show the need for water quality infrastructure funding to federal lawmakers who decide how much money our state will receive.
Visit the following link to provide the requested documentation for your municipal water infrastructure needs:

Non-Grant Opportunities

**Drinking Water Source Protection Program (DWSP2)**
The New York State Departments of Environmental Conservation (DEC) and Health (DOH) have announced a new initiative to assist municipalities with assessing and supporting drinking water source protection programs. The Drinking Water Source Protection Program (DWSP2) is a state-run program created to assist municipalities with proactively protecting their drinking water sources. The goal is to help municipalities develop and implement their own unique drinking water source protection plan for the source(s) of their drinking water.

In order to do so, the State is looking for communities to work with a technical assistance provider (TA provider), free of charge, to develop a DWSP2 Plan for their source of drinking water. TA providers will work with the community every step of the way, using the DWSP2 Framework, to develop a community specific DWSP2 Plan. As a result of this program, participating municipalities can use their newly developed DWSP2 plan to start implementing protection measures.

**The Affordable Connectivity Program**
The Affordable Connectivity Program is a Federal Communications Commission program that helps connect families and households struggling to afford internet service. This new benefit provides a discount of up to $30 per month toward broadband service for eligible households and up to $75 per month for households on qualifying Tribal lands. Eligible households can also receive a one-time discount of up to $100 to purchase a laptop, desktop computer, or tablet from participating providers. Eligible households can enroll through a participating broadband provider or directly with the Universal Service Administrative Company (USAC) using an online or mail in application. **NYSERDA**

**Community Heat Pump Pilot Program**

**Description:** A community-style heat pump system will use a network of pipes to share heating water among a cluster of buildings, where the cluster of buildings will use that heating water to produce comfort space heating of occupied spaces. The heating water could be centrally produced as hot water via electric-driven heat pumps and used in the buildings via radiators for hydronic heating or could be ambient-temperature water serving as a thermal source enabling electric-driven heat pumps located in each building. The heating water could also be used for production of domestic hot water, and a chilled water piping network could also be included to serve the comfort space cooling needs of the cluster of buildings. The solicitation will be competitive with multiple due dates and offers $15 million of funding to be allocated across multiple projects in four categories (all four of these categories can receive proposals at every due date):

A. Site-specific Scoping Studies  
B. Site-specific Detailed Design Studies  
C. Construction  
D. Best Practices Guidebooks

Deadline: August 29th and October 17th

FHWA

Bridge Investment Program

Description: A total of $2.36 billion in 2022 BIP funds are available for the Bridge Projects and Large Bridge Projects funding opportunities. These funds will be awarded on a competitive basis for bridge replacement, rehabilitation, preservation, and protection projects that: (1) improve the safety, efficiency, and reliability of the movement of people and freight over bridges; and (2) improve the condition of bridges in the United States by reducing (a) the number of bridges, and total person miles traveled over bridges, that are in poor condition or that are in fair condition and at risk of falling into poor condition within the next three years, or (b) the number of bridges, and total person miles traveled over bridges, that do not meet current geometric design standards or cannot meet the load and traffic requirements typical of the regional transportation network. In addition, Large Bridge Projects that receive a BIP award of not less than $100 million are eligible for multiyear grants, in which DOT can award available funds to a project over the course of several years in accordance with an agreement and in alignment with its schedule. In selecting Bridge Projects and Large Bridge Projects, FHWA will consider the extent to which BIP funds leverage non-Federal contributions from sponsors and stakeholders involved in the planning, design, and construction of eligible projects.

MLB - MLBPA

Youth Development Foundation Grants

Description: Major League Baseball (MLB) and the Major League Baseball Players Association (MLBPA) joined together to form a charitable foundation with a shared goal of increasing participation in and expanding access to youth baseball and softball. The MLB-MLBPA Youth Development Foundation (YDF) has awarded millions of dollars in grants to community-based projects that encourage and empower youth through baseball and softball in underserved communities. In response to the rising costs to access youth sports and protect children’s rights in sports, YDF funds capital projects, programming, and education initiatives in the United States and internationally to ensure that all youth have an opportunity to play and learn through baseball and softball. Organizations applying for funding must have a strong sense of mission, proven track record of increasing access to affordable youth baseball and/or softball, committed leadership and a dedicated staff, and understanding and knowledge of the community and population served.

Interested applicants must submit an initial Letter of Inquiry (LOI) with proof of secured or projected funding to be considered for an application. Proposals are accepted year-round and grant decisions are made on a quarterly basis.

For more information visit: [http://www.mlbpa.org/programs](http://www.mlbpa.org/programs)

Deadline: Rolling. Applications are accepted throughout the year, and grant decisions are made by its Board of Directors on a quarterly basis.

New York State
NYS Septic System Replacement Fund Program

Description: The New York State Septic System Replacement Fund Program provides funding to replace cesspools and septic systems in New York State. This grant program’s goal is to reduce the environmental and public-health impacts associated with the discharge from cesspools and septic systems to improve water quality. The program targets cesspools and septic systems near priority waterbodies. Failing systems along the Beaver River, Lower, and tributaries could be eligible for this funding. The state is providing Lewis County with funds to work with local property owners. Lewis County will provide grants to reimburse the property owner for up to 50% of the costs (up to a maximum of $10,000) of their eligible septic system project, include:

- replacement of a cesspool with a septic system; or
- installation, replacement or upgrade of a septic system or septic system components;
- installation of enhanced treatment technologies, including an advanced nitrogen removal system.
